

Using Sorbents in a Hazardous Substance Spill

Using Sorbent Socks

1. Use the socks to dam the spill.
2. Surround leaking containers.
3. Form a barrier around drains.

Using Sorbent Pads

1. Use the pads to mop up the spill, working back from the socks towards the source of the leak.

Using Sorbent Pillows

1. Use sorbent pillows to pick up large, deeper spills.

Using Loose Absorbents

1. Use the loose absorbent on uneven surfaces or rough ground.

Using Hazardous Waste Bags

1. Use the Waste Bag to place all contaminated sorbents and personal protective equipment.
2. Contact your local council for the correct disposal procedures in your specific area.

Refilling Spill Kits

1. Make sure you are prepared for any future spills by replacing any used items and keep your Spill Kit topped up.
